What is UV Board?

UV BOARD is a new type of building material with extremely high environmental protection and decorative properties. It is called as UV board because the coating is hardened and cured using ultraviolet light. UV boards are commonly used for kitchen cabinets, wardrobes, wall panels, and furnitures, offering a stylish look along with durability and easy maintenance.

What is PVC Wall Sticker?

A PVC wall sticker is a decorative item made from soft, durable plastic called polyvinyl chloride (PVC). The sticker has an adhesive back, allowing it to be peeled and stuck directly onto the wall. It offers a simple, affordable, and mess-free way to decorate, and can usually be removed without causing damage to the surface.

Features:

- Fast to Apply
- Durable
- Removable & Reusable
- Customizable
- Affordable
- Maintenance-Free
