Finishing Touches:

- •Metal trim: For a polished look, install metal trim along the edges and corners of the panel installation, using nails or adhesive.
- •Remove protective film: Carefully peel off the protective film from the surface of the installed panels.

Important considerations:

- Adhesive selection: Choose a construction adhesive specifically designed for PVC or similar materials to ensure proper bonding.
- •Cutting technique: Use a sharp blade to avoid chipping the edges of the panels.
- •Leveling tools: Always use a level to ensure your panels are installed straight and even.
- Safety precautions: Wear protective gear like gloves and eye protection when cutting and installing the panels.

UV BOARD ACCESSORIES:

Functions of Aluminum Trim:

- •Protection: Aluminum trim protects the edges of materials from rough edges. It can also protect walls, boards, and tiles.
- •Decoration: Aluminum trim can add an aesthetic touch to a project. It can come in a variety of colors, such as gold, black and silver.
- •Finishing: Aluminum trim can be used as a finishing touch for a project. It can give a neat, high-end finish to a countertop, table, bar, or shelving.
- •Durability: Aluminum trim can increase the durability and longevity of the material it's attached to.
